\_\_\_\_ has been certified by the Texas Department of Insurance as an Independent Review Organization. The Texas Worker's Compensation Commission has assigned this case to \_\_\_\_ for independent review in accordance with TWCC Rule 133.308 which allows for medical dispute resolution by an IRO.

\_\_\_\_ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. In performing this review, all relevant medical records and documentation utilized to make the adverse determination, along with any documentation and written information submitted, was reviewed.

The independent review was performed by a matched peer with the treating doctor. This case was reviewed by a licensed Medical Doctor with a specialty and board certification in Orthopedic Surgery. The \_\_\_\_ health care professional has signed a certification statement stating that no known conflicts of interest exist between the reviewer and any of the treating doctors or providers or any of the doctors or providers who reviewed the case for a determination prior to the referral to \_\_\_\_ for independent review. In addition, the reviewer has certified that the review was performed without bias for or against any party to the dispute.

#### CLINICAL HISTORY

\_\_\_\_ has chronic lower back pain. In 1987 he underwent a posterior lumbar interbody fusion. He gradually had increasing pain and underwent an L3/4 microlumbar discectomy in 1992 for chronic lumbar radiculitis/radiculopathy.

Postoperatively, the patient has had recurrent chronic lower back pain radiating into his left thigh and buttocks with numbness into his left foot.

\_\_\_\_ is currently under the care of \_\_\_\_, a diplomat of the \_\_\_\_\_. His diagnosis is chronic pain syndrome. \_\_\_\_ has been recommended a referral to \_\_\_\_ for a trial of lumbar epidural steroid injections. It is noted he failed a conservative approach to include an exercise program. He is on anti-depressant medicine as well as anti-inflammatory medicines and intermittent narcotic analgesics.

## REQUESTED SERVICE

A trial of lumbar epidural steroid injections is requested for this patient.

## DECISION

The reviewer disagrees with the prior adverse determination.

## BASIS FOR THE DECISION

Based on the records provided, the trial of lumbar epidural steroid injections would be a reasonable and medically necessary intervention at this time. Please note that this patient has chronic lower back pain secondary to failed back syndrome/chronic pain syndrome. The records indicate the patient has lumbar degenerative disc disease that appears to be the pain generator in this case. It is reasonable to recommend a trial of lumbar epidural steroid injections at this time.

\_\_\_ has performed an independent review solely to determine the medical necessity of the health services that are the subject of the review. \_\_\_ has made no determinations regarding benefits available under the injured employee's policy.

As an officer of \_\_\_, I certify that there is no known conflict between the reviewer, \_\_\_ and/or any officer/employee of the IRO with any person or entity that is a party to the dispute.

\_\_\_ is forwarding by mail and, in the case of time sensitive matters by facsimile, a copy of this finding to the treating doctor, payor and/or URA, patient and the TWCC.

Sincerely,
